ADVANCES IN PHYTOREMEDIATION

(dedicated to Robert R. Brooks)

6th International Conference on the Biogeochemistry of Trace Elements (ICOBTE)
University of Guelph, Canada, 1–2 August 2001

Guest editors:
A.J.M. Baker, D. van der Lelie, J. Vangronsveld & F.J. Zhao

Preface vii

Tribute ix–xii

Metal accumulation and competitive ability in metallicolous and non-metallicolous *Thlaspi caerulescens* fed with different Zn salts
P. Meerts, Ph. Duchêne, W. Gruber and C. Lefèbvre 1–8

Genetic basis of Cd tolerance and hyperaccumulation in *Arabidopsis halleri*
V. Bert, P. Meerts, P. Saumitou-Laprade, P. Salis, W. Gruber and N. Verbruggen 9–18

Distribution of cadmium and zinc in the hyperaccumulator *Thlaspi caerulescens* grown on multicontaminated soil
K. Perronnet, C. Schwartz and J.L. Morel 19–25

Phytoextraction of cadmium with *Thlaspi caerulescens*
C. Schwartz, G. Echevarria and J.L. Morel 27–35

Assessing the potential for zinc and cadmium phytoremediation with the hyperaccumulator *Thlaspi caerulescens*
F.J. Zhao, E. Lombi and S.P. McGrath 37–43

Applying a solute transfer model to phytoextraction: Zinc acquisition by *Thlaspi caerulescens*
S.N. Whiting, M.R. Broadley and P.J. White 45–56

Tropical hyperaccumulators of metals and their potential for phytoextraction
R.D. Reeves 57–65

Root development and heavy metal phytoextraction efficiency: comparison of different plant species in the field
C. Keller, D. Hammer, A. Kayser, W. Richner, M. Brodbeck and M. Sennhauser 67–81

Chelate-assisted phytoextraction using canola (*Brassica napus* L.) in outdoors pot and lysimeter experiments
W.W. Wenzel, R. Unterbrunner, P. Sommer and P. Sacco **83–96**

Plant availability of thallium in the rhizosphere of hyperaccumulator plants: a key factor for assessment of phytoextraction
H. Al-Najar, R. Schulz and V. Römheld **97–105**

Development of a technology for commercial phytoextraction of nickel: economic and technical considerations
Y.-M. Li, R. Chaney, E. Brewer, R. Roseberg, J.S. Angle, A. Baker, R. Reeves and J. Nelkin **107–115**

Phytoextraction: an assessment of biogeochemical and economic viability
B. Robinson, J.-E. Fernández, P. Madejón, T. Marañón, J.M. Murillo, S. Green and B. Clothier **117–125**

Potential of *Salix* as phytoextractor for Cd on moderately contaminated soils
E. Klang-Westin and J. Eriksson **127–137**

Chromium in the environment: factors affecting biological remediation
A.M. Zayed and N. Terry **139–156**

Selenium phytoremediation potential of *Stanleya pinnata*
D.R. Parker, L.J. Feist, T.W. Varvel, D.N. Thomason, Y. Zhang **157–165**

Trends in phytoremediation of radionuclides
S. Dushenkov **167–175**

Selecting plants to minimise radiocaesium in the food chain
P.J. White, K. Swarup, A.J. Escobar-Gutiérrez, H.C. Bowen, N.J. Willey and M.R. Broadley **177–186**

Progress in remediation and revegetation of the barren Jales gold mine spoil after *in situ* treatments
M. Mench, S. Bussière, J. Boisson, E. Castaing, J. Vangronsveld, A. Ruttens, T. De Koe, P. Bleeker, A. Assunção and A. Manceau **187–202**

Using municipal biosolids in combination with other residuals to restore metal-contaminated mining areas
S.L. Brown, C.L. Henry, R. Chaney, H. Compton and P.S. DeVolder **203–215**

Selected bioavailability assays to test the efficacy of amendment-induced immobilization of lead in soils
W. Geebelen, D.C. Adriano, D. van der Lelie, M. Mench, R. Carleer, H. Clijsters and J. Vangronsveld **217–228**

Vegetative approach for improving the quality of water produced from soils in the westside of central California
G.S. Bañuelos, S. Sharmarsakar, D. Cone and G. Stuhr **229–236**

Volume 249 No. 2

Impacts of grazing on the alkalinized–salinized meadow steppe ecosystem in the Songnen Plain, China – A simulation study
Z. Shang, Q. Gao and M. Dong **237–251**

Integral energy as a measure of soil-water availability
B. Minasny and A.B. McBratney **253–262**

Comparative water use-efficiency of *Sporobolus arabicus* and *Leptochloa fusca* and its relation with carbon-isotope discrimination under semi-arid conditions
J. Akhter, K. Mahmood, M.A. Tasneem, M.H. Naqvi and K.A. Malik **263–269**

Chemical characterization of root exudates from rice (*Oryza sativa)* and their effects on the chemotactic response of endophytic bacteria
M. Bacilio-Jiménez, S. Aguilar-Flores, E. Ventura-Zapata, E. Pérez-Campos, S. Bouquelet and E. Zenteno **271–277**

Potassium uptake by Chinese cabbage (*Brassica pekinensis* Rupy.) from fused potassium silicate, a slow-releasing fertilizer
Y. Yao, T. Yoneyama and H. Hayashi **279–286**

Genotypes of lucerne (*Medicago sativa* L.) show differential tolerance to manganese deficiency and toxicity when grown in bauxite residue sand
M.J. Gherardi and Z. Rengel **287–296**

Combined effects of air and soil pollution by fluoride emissions on *Tibouchina pulchra* Cogn., at Cubatão, SE Brazil, and their relations with aluminium
M. Domingos, A. Klumpp, M.C.S. Rinaldi, I.F. Modesto, G. Klumpp and W.B.C. Delitti **297–308**

Fire history influences on the spatial heterogeneity of soil nitrogen transformations in three adjacent stands in a dry tropical forest in Thailand
M. Hirobe, N. Tokuchi, C. Wachrinrat and H. Takeda **309–318**

Changes in soil properties after afforestation of former intensively managed soils with oak and Norway spruce
E. Ritter, L. Vesterdal and P. Gundersen **319–330**

Spatial variability in mycorrhizal hyphae and nutrient and water availability in a soil-weathered bedrock profile
L.M. Egerton-Warburton, R.C. Graham and K.R. Hubbert **331–342**

Nutrient availability and leaching in an archaeological Anthrosol and a Ferralsol of the Central Amazon basin: fertilizer, manure and charcoal amendments
J. Lehmann, J.P. da Silva Jr., C. Steiner, T. Nehls, W. Zech and B. Glaser **343–357**

Bracken (*Pteridium aquilinum* L.) frond biomass and rhizosphere microbial community characteristics are correlated to edaphic factors
L.S. Watrud, S. Maggard, T. Shiroyama, C.G. Coleman, M.G. Johnson, K.K. Donegan, G. Di Giovanni, L.A. Porteous and E.H. Lee **359–371**

Effects of arsenate and phosphate on their accumulation by an arsenic-hyperaccumulator *Pteris vittata* L.
C. Tu and L.Q. Ma **373–382**

Genotypic variation in silicon concentration of barley grain
J.F. Ma, A. Higashitani, K. Sato and K. Takeda **383–387**

Zn fertilization improves water use efficiency, grain yield and seed Zn content in chick-pea
H.R. Khan, G.K. McDonald and Z. Rengel **389–400**

A coupled model of photosynthesis-transpiration based on the stomatal behavior for maize (*Zea mays* L.) grown in the field
G.-R. Yu, T. Kobayashi, J. Zhuang, Q.-F. Wang and L.-Q. Qu **401–415**

Volume contents **417–419**

Author index **421–422**
